GENERAL REVIEW

Routine inspection was carried out on 9,949 children—

The number of children examined non-routinely, i.e., at clinics mainly, was 300.

IMPROVEMENT TO SCHOOLS

REPORT ON SANITARY IMPROVEMENTS TO SCHOOLS WITHIN THE COUNTY FOR THE YEAR ENDING 31st, JULY 1973

During the current year Knoxland Primary School, Dumbarton, has been replaced with an entirely new school with all modern amenities which for so long the former school has been in need. An extension has been added to Pirniehall Residential School and in it showers and additional toilets have been provided.

Improved staff accommodation has been provided at Levenvale, St. Kessog's, St. Peter's and Goldenhill Primary Schools and also at Kirkintilloch and Greenfaulds High Schools. At Levenvale and Goldenhill additional toilets were also included in the extension.

At Luss Primary School a dining room and servery has been built which means the children no longer require to dine at their desks. At St. Kessog's Primary School the kitchen has been enlarged to cater for the additional roll of the school.

At the undernoted schools, hutted classrooms have been erected, all of which have toilet facilities:

Rosneath Primary
John Logie Baird Primary
Haldane Primary
St. Kessog's Primary
St. Peter's Primary
Dalmuir Primary
Killermont Primary
Gartconner Primary
Our Lady's High
Carbrain Primary
Langlands Primary
St. Mary's Primary (Cumbernauld)

Sinks have been installed in several classrooms of two schools at a cost of £1350·00 and stainless steel sink and sterilising units have been fitted to replace the earthenware sinks and wood drip boards in four schools at a total cost of £2,600·00.

Due to the impending opening of Our Lady of Loretto Primary School which will relieve St. Stephen's Primary, nine old hutted classrooms there have been demolished, similarly when Baljaffray and Mosshead Primary Schools open, all the hutted classrooms will be removed from Bearsden Primary.

Twenty primary and three secondary schools have been completely painted outside and inside at a cost of £110,000·00.

CHIEF DENTAL OFFICER'S REPORT

Staffing again remained something of a problem so far as Dental Officers were concerned, but while two did resign during the year we were most fortunate, considering past experience, to be able to recruit two replacements for them within a relatively short space of time.

A Dental Health Campaign was again organised for the five-year-old children starting school. This proved successful as usual thanks to the willing help and co-operation which we again obtained from all the staff of the schools concerned. These campaigns which are part of a national scheme are an excellent way of emphasising the great importance of dental care both to the children and to their parents.

With regard to courses the County Council showed their appreciation of the usefulness of such opportunities of keeping staff up-to-date with the latest advances and techniques in dentistry by authorising the second-

ment of several of our Dental Officers to appropriate courses of study and those attending not only benefited themselves but were in a position to pass on what they had gained from them to their colleagues.

SHEILA S. STEWART.

SPEECH DEPARTMENT ANNUAL REPORT SESSION 1972-73

This is a time when great changes are imminent in the administration of services all over the country. I now present the final report on the dual department of Speech Therapy and Speech Training.

It is with some satisfaction that I am able to say that, despite extreme shortage of qualified speech therapists, our County has been reasonably well serviced. We commenced the new session two short of our former staff, and another therapist left at Christmas. Compared with other counties, however, we have been fortunate in maintaining staff at a workable level, and of high quality. Throughout this session we have had six full-time and six part-time Speech Therapists, including three of senior grade. At Easter, one of the seniors, Mrs. Kerr, resigned from the post but has continued in a part-time capacity, and we are grateful for the good work she has done, and continues to do, for the benefit of the children.

As in former years we accepted students for clinical training. This year we had fifteen in all, including, first, second and diploma year grades. One of these students, Mrs. Dangerfield, completed the course and was examined for her diploma in our Kildrum Centre. She intends to apply for an appointment in the Speech Therapy service of this county in the coming session. Due to the fact that the training for Speech Therapy is now to be undertaken by the university and the qualification will be B.Ed. (Speech), which is a four-year course compared with the former three-year Jordanhill Course, there will tend to be an even greater shortage in the next year or two.

It is unfortunate that, at the end of this session, we must accept the resignations of two of our part-time members, Mrs. Miller and Mrs. Paton. The former has been with the county almost continuously over a period of thirteen years, both previous to, and following her marriage. Mrs. Paton came for a short period in 1966, and returned again in 1971. They were extremely well liked in the areas in which they served, and we thank them for the excellent work they have done. I would also thank Mrs. Forbes, a former member of staff, who came back temporarily this

year during an emergency, and Mrs. Wright who has served for a short period in the Helensburgh area, but who leaves in July.

It is with great pleasure that I learn that Mrs. Wilson, former senior speech therapist on my staff in the East area of the County, will take over the reign of office as Principal of the speech therapy staff.

As the county expands, the need for the service grows daily, and the appended statistics show clearly the high numbers dealt with by the therapists, with a commendable degree of success. Speech therapy service has been available to both pre-school and school children. The schools have been most co-operative in the matter of accommodation for the speech therapists working within them, and the Chief Medical Officer has provided suitable arrangements for those working in health centres. We have, as always, had the benefit of advice and help in this work from the medical officers, visiting specialists, our honorary consultant, Dr. Anne McAllister, psychologists, teachers, health visitors, and audiometricians. In addition, we have maintained the previous allocation of three sessions per week to the hospitals, and adults belonging to the county have had the benefit of the service when required.

Meetings of the speech therapists were held monthly, at which any new methods, or cases of special difficulty were discussed. Tape recordings of specialists in the field of speech therapy were available for reference, in addition to the nucleus of a reference library.

I have continued to give lectures and talks, on request, to infants' and nursery school teachers and supervisors of playgroups, both during the day and at evening sessions in Dumbarton, Clydebank and Helensburgh.

The liaison between the teacher of speech training and the speech therapist proved to be of value, particularly when the county had a staff of such teachers visiting the primary schools. Since the G.T.C. regulations came into being we have gradually lost these teachers. The few specialists in speech and drama on our staff at present (6 in all) are concerned with secondary education. Only one teacher, Mrs. Willett, now carries out, in part, the scheme whereby the specialist in the secondary school also teaches the top primaries which feed it. One recent addition to the staff, Mrs. Weir, who took up an appointment in September, 1972, requested primary work, and serves in Lairdsland and Townhead primary schools. She was a lecturer at the Scottish Academy, but came to the county because of her great interest in developing oral ability in young children. Mrs. Govier did good work in Cumbernauld High School, but, unfortunately she was only a short time with us when she had to remove to the south in December, for domestic reasons. Miss Stewart, who has been on the staff for three years and is presently at St. Ninian's, Kirkintilloch, leaves at the end of this session, to take up another post. Our good wishes go with her.

In the secondary schools the work was carried out within the English

Department and the programme was mainly to cover the first and second years, with the approach being towards clearer thinking and oral facility. Groups of third year pupils, particularly those about to leave school, were taken and groups for drama were selected by pupils' choice in the upper three years. This work seems to have been of benefit because, by and large, heads of English Departments have been requesting to retain such a specialist teacher, or have one allocated to the school.

In addition to the work in communication, several drama items have been produced for school occasions, and three public performances were presented in Douglas Academy, St. Andrew's, Clydebank, and Greenfaulds High School.

A one-day conference on speech and movement, was arranged for primary teachers, and was held on 9th November in Greenfaulds High School. It was designed to try to show how the two subjects of speech and drama and physical education might integrate in some measure, for the benefit of both. It was well attended by teachers in the Cumbernauld area, who were much interested and stimulated by the proceedings. In addition to representations from our own staff, a demonstration was given on sound and movement by Mr. Stewart Hopps, Associate Director of the Scottish Theatre Ballet. Subsequently on visiting some of the schools, I had 'follow-up' talks with teachers, who had found it of benefit, and would have welcomed further opportunities of such conferences, to continue the work to a further stage. I hope that such work may eventually be carried out in other areas.

The Scottish Theatre Ballet Movable Workshop visited Braidfield School, Clydebank on 1st February, 1973. The members of this workshop worked with a selected number of secondary pupils from Clydebank High and St. Andrews secondary schools during the day, and a performance was given, in the evening, for parents and pupils. This was most successful.

I attended a demonstration by the Scottish Theatre Ballet, for supervisors, teachers and other interested, which was held in Notre Dame College of Education on Tuesday, 27th February, 1973. There were some progressive ideas which promise to be helpful.

The Spoken English Panel of the County's English Development Centre, invited me to a meeting on 28th February, 1973, when future proceedings were under discussion. The one-day conference of lecturers of speech and drama held in Jordanhill College of Education on 28th October, 1972, was interesting and of value. By courtesy of the Education Committee, I went to the July-August, 1972, Course by Peter Slade at the University of Keele, Staffordshire. I selected the section on procedures in secondary schools, so that I might have further ideas to share with the teachers of Speech and Drama.

I should like to conclude this report on a personal note. I came to

Dunbartonshire to start the dual department of speech therapy and speech training in 1959. It was something of a challenge, and any success achieved was due to the valuable co-operation and help which I received from all in the county with whom I worked. In particular, I would thank Mr. J. Murray Allan for his guidance and support over the years, and would extend to him my congratulations on his appointment as the Director who will succeed Mr. Cameron.

Over the period from 1959 to date, the speech therapy staff was maintained at an average each year of 12. This was never enough because of the ever-growing needs, but, for the size of the county and numbers of children involved, we had perhaps the fullest coverage of any area in Scotland. More than forty-two therapists had been in our service. For the subject of speech and drama we had over fifty-three specialist teachers visiting our schools.

We were fortunate that Mrs. Hagen joined the clerical staff in November, 1968, and I thank her for so ably and efficiently assisting with the administration of the speech department.

The county has always been forward looking, and I thank the Committee for the years I was privileged to serve in it. Progress inevitably means change, and my best wishes go with all who will be working within the region which includes Dunbartonshire, when the Government's new proposals for administration of regions and services are implemented.

Session 1972/73

SPECIAL SCHOOLS AND OCCUPATIONAL CENTRES

(a) SPECIAL SCHOOLS

Auchentoshan School, Clydebank

This school caters for mentally handicapped, physically handicapped and partially sighted children. During session 1972/73 the numbers of pupils in attendance were:—mentally handicapped 172; physically handicapped 12; partially sighted 1.

Elmwood School, Dumbarton

This school caters for deaf and partially deaf pupils. The roll during session 1972/73 was 18.

Merkland School, Kirkintilloch

This school caters for mentally handicapped and physically handicapped pupils. During session 1972/73 the numbers of pupils in attendance were:—mentally handicapped 74; physically handicapped 4.

Glencryan School, Cumbernauld

This school caters for mentally handicapped and physically handicapped pupils. During session 1972/73 the numbers of pupils in attendance were: mentally handicapped 89; physically handicapped 7.

(b) OCCUPATIONAL CENTRES

Helensburgh Occupational Centre

There were 16 pupils on the roll of this Centre.

Auchentoshan Occupational Centre, Clydebank

There were 72 pupils on the roll of this Centre.

Cumbernauld Occupational Centre

There were 26 pupils on the roll of this Centre.

MILK IN SCHOOLS

In terms of the Milk and Meals (Education) (Scotland) Regulations, 1971, which came into operation on 28th September, 1971, the supply of milk to pupils in schools was limited to those in primary schools until the 1st of August after such pupils attained the age of seven; to pupils receiving education in special schools and to those other primary school pupils in respect of whom a medical officer of the Authority certified that they required to be provided with milk at school for health reasons.

158 applications were received from parents who wished their children to be considered for health reasons.

After each application had been considered and where necessary medical examinations had been carried out 25 pupils were certified as requiring free milk in school on health grounds.

ULTRA-VIOLET LIGHT TREATMENT

The following are details of the work done at Dumbarton, Clydebank, Kirkintilloch, Bearsden, Alexandria, Helensburgh, Croy, Milngavie and Goldenhill Clinics during the year.

SYSTEMATIC EXAMINATIONS

The following tables are supplied by the Scottish Home and Health Department from information given to them by this Authority on the new record card introduced by the Government. With regard to these tables it should be noted that in some cases the results are expressed as a rate per 100,000 children examined and one therefore has to take this factor into consideration when interpreting the results given in view of the fact that the total average number on the roll of the county schools amounted only to 51,065.
